LES 300

## LES 200

### Why was the product developed?

**Regulatory requirements:** bridge into the LED era as direct response to the prohibition of classic T5 and T8 fluorescent luminaires

**Revitalisation:** development of a solution which further uses existing infrastructure optimising resources and costs

### Which problems are solved by the luminaire?

**Optimised installation:** elimination of lost time through fast, tool-free installation in old housings by means of magnetic holder

**Simplified light planning:** thanks to flexible MultiLumen function

**Streamlined storage:** reduced product variety, as only a single product covers different levels of brightness

### Product benefits

- + **High efficiency:** luminous efficacy of up to 165 lm/W
- + **Flexible luminous flux:** DIP switch operable externally
- + **Glare-free optics:** homogeneous opal diffuser for uniform light
- + **Sets ready for installation:** including connection cables and cable holders for seamless installation
