

Moisture-proof luminaires

PLANTOS

Why was the product developed?

Refurbishment with a sense of proportion: developed to replace classic fluorescent tubes (36 W/58 W), without generating unnecessarily high luminous fluxes and thus energy usage

Which problem is solved by the luminaire?

No excess illumination, no misinvestment: tailor-made instead of unnecessarily high connection values for identical luminous fluxes and preservation of light concept and glare values in the room

Product benefits

- + **Spot landing:** precise adjustment on T8 level (36 W/58 W), perfectly suitable for refurbishment
- + **Price-performance:** maximally efficient through focus on the essential
- + **Speed installation:** smart plug system for minimal installation times
