

Compact luminaires

Overview

Accessories

Tripods

Multi-adapter for DIN pin

Bag for luminaire

GLADIATOR SL I B18V

Why was the product developed?

Maximum independence: mobile light solution, which works independent of stationary power supply

Focus on compatibility: with available professional battery systems to avoid additional procurement costs

Which problems are solved by the luminaire?

Flexibility at the building site: professional light for work in locations without any power supply

Increased safety: dispensing with extension cables reduces trip hazards

Reduced procurement costs: thanks to high battery compatibility

Light quality suitable for requirements: homogeneous, dimmable lighting

Product benefits

- + **Multi-battery interface:** compatible with 18 V systems from BOSCH/ AMPShare; Makita and Milwaukee via adapter
- + **Extreme robustness:** impact-resistant and non-breakable 2-component design
- + **High light quality:** especially broad, homogeneous light beam for work (5-step dimmable)
- + **Practical flexibility:** optional tripods and brackets as accessories

Available | Price from €175.00
