

Compact luminaires

Overview

Tripod connection

Suspension

AKIRUS

Why was the product developed?

Focus on the essential: development of a compact work luminaire without comprehensive additional features

Performance orientation: objective of maximum luminous efficacy

Which problems are solved by the luminaire?

Put an end to lack of space: compact design and low weight facilitate handling and storage

Easy repairs: fast repairs due to replacement of power cable in case of damage without tools

High resistance: extremely durable due to aluminium frame and high type of protection

Product benefits

- + **Compact design:** foldable, robust aluminium frame for easy handling, type of protection IP 65
- + **High efficiency:** 5000 lm luminous flux at 170 lm/W
- + **Well thought out practicality:** power cable replacement without tools
