

Highbay luminaires

Overview

Accessories

LIGHT CASE 2

Why was the product developed?

Maximum efficiency in very small spaces: aim to pack the enormous light output of the proven Light Case into an ultra compact housing

Change of style: replace cumbersome, heavy multi-flame spotlights with a minimalistic "Power Unit"

Conservation of resources: reduced material use without losses during light output

Which problems are solved by the luminaire?

Maximum performance: up to 27500 lm (DALI version) from a single, compact module

Replacement for multi-flame spotlights: 1-flame version already replaces conventional multi-flame spotlights

Optimum static: minimum dead weight and lowest wind load

Operating range: -30 °C to +70 °C

Product benefits

- + **High-end efficiency:** up to 200 lm/W – one of the top performers on the market
- + **Smart & precise:** DALI 2, 2 light colours and 3 special lens optics
- + **Material benefit:** 1-, 2- or 3-flame design replaces conventional 2- and 4-flame spotlights
- + **Well thought out design:** lowest cost of materials with smooth dust-repellent surface
- + **Plug-and-Play:** fast installation due to compact design and well thought out connection technology
