## SYSTEM BOLLARD WITH MOTION DETECTOR

### Why was the product developed?

**Control tailored to requirements:** development of intelligent outdoor lighting, which automatically adjusts when persons are present

**Safety & orientation:** ensures protection outdoors without annoying constant lighting

### Which problems are solved by the product?

**Less waste:** prevents unnecessary energy consumption and light pollution with lighting tailored to requirements

**Reduced effort:** automatic control renders manual switching superfluous

**More comfort and safety:** increases the sense of security and user friendliness

### Product benefits

- + **High-quality PIR sensor:** extremely reliable performance outdoors thanks to heat detection
- + **Smart Casambi networking:** wireless control, simple app configuration and integration in individual lighting scenarios
