LES 300

Why was the product developed?

Overcoming of system limits: development of a "universal adapter" for refurbishment tasks in the professional world of continuous lines

Manufacturer independence: enables the use of RZB top technology in mounting rails of any brands

Simplicity: focus on revitalisation of existing mounting rails without costly complete replacement

Which problems are solved by the luminaire?

Reduced effort: up to 50% less installation time

Relieved budgets: lowered costs thanks to shortened work times and reduced material use by maintaining existing infrastructure

No compatibility stress: simple planning thanks to fitting of new inserts in existing third-party systems

Product benefits

- + **Plug & Play:** fits into almost all third-party systems
- + **Efficacy miracle:** up to 187 lm/W immediately reduce the operating costs
- + **Flex solution:** MultiLumen driver for simple adjustment on site
- + **Speed installation:** tool-free use in seconds with special spring lock
