

## Pole luminaire

### Overview

Mini

Midi

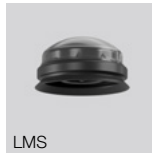

### Accessories

Pole tops

Wall extension

LMS

Cable connection box

## MINGATA

### Why was the product developed?

**Portfolio extension:** efficient light technology for highest safety on public roads and paths

**Highest flexibility:** universal design for different pole types and light requirements

**Urban efficiency:** robust solution for long-term reduction of communal operating costs

### Which problems are solved by the luminaire?

**No compatibility issues:** fits any standard pole due to combined pole-top and side-entry mounting on every standard pole

**Put an end to complex maintenance:** no difficult work at height thanks to quick access without tools

**Optimised operating costs:** reduced operating times and more efficient maintenance due to innovative locking system

### Product benefits

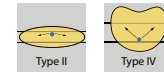

- + **Eccentric lock system:** for lightning fast maintenance without tools
- + **Service-optimised design:** replacement of the carrier plate without dismantling the entire luminaire
- + **Maximised precision:** perfect light control due to individually tiltable luminaire with integrated degree scale of the angle of inclination
- + **Smart city compatible:** optional Zhaga base for easy retrofitting of light management systems
