

## RZB ENERGY

## WALLINO

### Why was the product developed?

**Full service approach:** one partner for all charging solutions – from company headquarters to company car at home

### Which problems are solved by the luminaire?

**Reduced complexity:** automated recording and invoicing of the charging current

**Overview versus data chaos:** seamless integration of the home charging points into the central vehicle fleet management

**No charging cable acrobatics:** time-consuming handling and storage is no longer needed with firmly attached 7 m charging cable

### Product benefits

- + **Time booster:** simple installation due to supplied drill template, fast setup and control via app
- + **Reporting power:** automated charging reports (PDF/CSV) at the touch of a button
- + **Future-proof functionality:** meets requirements in accordance with Section 14a EnWG [German Energy Industry Act] as well as Plug and Charge in accordance with ISO 15118, suitable for PV excess charging
