LES 100

Why was the product developed?

Regulatory requirements: creation of a simple possibility for switching from old TC and E27 lighting to modern LED technology

Revitalisation: development of a solution which further uses existing infrastructure optimising resources and costs

Which problems are solved by the luminaire?

No costly complete replacement: thanks to tool-free integration in existing metal housings with height-adjustable magnetic bases

More planning reliability: flexible adjustment on site thanks to MultiLumen and MultiColour

Product benefits

- + **High efficiency:** luminous efficacy of up to 165 lm/W, extremely easy to maintain
- + **Extremely light quality:** homogeneous light distribution due to special lens optics
- + **Durable:** robust design and a service life of up to 100000 h
- + **Installation-friendly:** adjustable magnetic bases perfect for refurbishment projects
