

Highbay luminaires

INDUSTRIAL HALL

Why was the product developed?

Put an end to "just bright": real technical brilliance instead of bland standard goods

Pure precision: different optics and modular accessories for the tailor-made light solution under hardest demands in industry and logistics

Which problems are solved by the luminaire?

No more waste of light: targeted light control tailored to requirements, lowering energy costs caused by unnecessary lighting

Maximised visual comfort: thanks to glare-free lens optics and optimised light control

Installation-friendly: easy to install thanks to 1-point suspension. Perfect for 1:1 replacement during refurbishment.

Product benefits

- + **Glare-free lens optics:** targeted light control and glare-free light quality for any hall geometry
- + **Intelligent sensors:** easily retrofittable HF sensors for presence-dependent switching
- + **Modular accessories:** optional refractors for decorative light or reflectors for glare control.
- + **Robust and durable:** high type of protection and optimised thermal management with smooth surface for a self-cleaning effect with hardly any dust deposits
