

RZB ENERGY

BOCARO RETROFIT

Why was the product developed?

GEIG compliance: compliance with the legal obligation for preliminary setup with specific neu building/renovation projects

Cost efficiency: compliance with GEIG minimum requirements without immediate investment in expensive charging technology

Which problems are solved by the luminaire?

Relief from legal pressures: immediate GEIG compliance without expensive full equipment

Lowered investment obstacle: prevention of high initial costs due to upgradability that is tailored to requirements

Put an end to building sites: saves future excavation work by taking cables and empty conduits at the time of installation into account

Clean appearance: 2-in-1 solution as luminaire and charging station

Product benefits

- + GEIG-ready
- + Modular, retrofittable, future-proof
- + Effort- and cost-saving
