

Compact luminaires

Overview

Accessories

Tripods

Tie bars

Magnet holders

GLADIATOR II

Why was the product developed?

Individual light solutions: development of a versatile configurable solution for versatile customer requirements in the professional field

Which problems are solved by the luminaire?

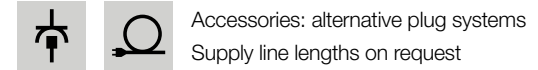

Improved flexibility: provides options such as switches, sockets or battery operation for network-independent working

Designed for challenging conditions: impact-resistant and non-breakable housing withstands mechanical strains, high type of protection against external influences

Product benefits

- + **Robustness:** impact-resistant and non-breakable 2-component housing type of protection up to IP 66
- + **Specialisation:** versions with safety extra-low voltage for special industrial applications
- + **Light quality:** broad glare-reduced light beam
- + **Expandability:** practical tripods and brackets as optional accessories
