

## Recessed and surface-mounted spotlights

### Overview

## TX-MOVE

### Why was the product developed?

**Merging of form and function:** symbiosis of flat design and maximum flexibility

**Real staging:** development of a specialised luminaire, which shines a perfect light on the products in different scenarios

### Which problem is solved by the luminaire?

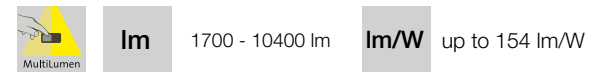

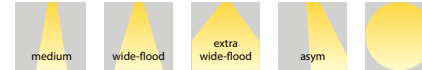

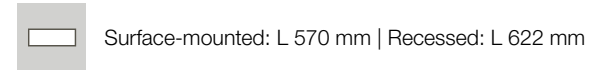

**Removal of shadow zones:** with wide-area, uniform ambient lighting or directional illumination of large areas

**Versatile areas of application:** high light quality for supermarkets, fashion, automotive, hardware stores and many more

### Product benefits

- + **Sophisticated design:** extremely flat, versatile aesthetics
- + **Application-specific light quality:** thanks to lens optics and a wide range of lighting technologies
- + **High flexibility:** with three-stage MultiLumen and swivel- and rotatability of the luminaire
- + **Pioneering:** resource-saving modular system with replaceable, recyclable components
