

LUPALO CHARGING STATION

Why was the product developed?

Hybrid solution: light and charging technology, combined as basic need of each parking area

Comprehensive use: designed as universal answer to private, semi-public and public spaces

Which problems are solved by the luminaire?

Farewell to lack of space: tidy parking spaces thanks to 2-in-1 concept with aesthetic design

Costs cut: reduced planning, time and installation costs

Carefree aging: eliminates the risk of technical standstill with modular, replaceable components.

Product benefits

- + **Top performance in very small spaces:** up to 2 x 22 kW charging power
- + **Legally watertight:** invoicing compliant with calibration regulations – also in the charging network
- + **Quality from Bamberg:** future-proof and modular design with replaceable components, Made in Germany
- + **Well protected:** integrated startup protection in accordance with DIN IEC/TS 61439-7 renders additional ram protection superfluous
- + **360° service:** individual project planning, commissioning, maintenance, hardware and software support, and much more
