LIGHTSTREAM MINI

Why was the product developed?

Future-oriented upgrade: design as contemporary successor of the lightstream spotlights

Cost-optimised introduction: creation of an attractively priced solution in the field of pole luminaires

Efficiency through synergies: flexible applications as hybrid product with reduced product variety

Which problems are solved by the luminaire?

Put an end to inconsistent aesthetics: spotlight and pole luminaire as hybrid product in visual harmony, without prioritisation issue between uniform design and installation type

Reduced planning complexity: meeting almost any requirement thanks to enormous range of luminous flux and housing sizes

Product benefits

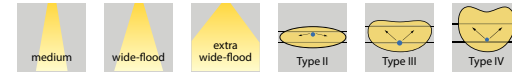

- + **Future-proof:** components based on Zhaga standards with long-term replaceability
- + **Precise:** effective prevention of light pollution (Ulor 0%)
- + **Smart city-compatible:** integrated Zhaga base as interface to systems such as ESave
